

VENTURA SPRINGS

A multifamily affordable and supportive housing development for Veterans
 Co-Developed by A Community of Friends and U.S.VETS

PROJECT DESCRIPTION

Ventura Springs, located on 10-acres of land previously owned by the City of San Buenaventura, will be a new community made up of 122 apartments for formerly homeless veterans as well as low-income veterans and their families. The 11 buildings that make up Ventura Springs are primarily two-story walk-ups with two three-story buildings, and are surrounded by vibrant courtyards with a variety of uses and activities. The site is designed to create a traditional, family-oriented neighborhood where sidewalks are activated by pedestrian pathways and residential front doors that face the street. The goal of Ventura Springs is to create a community that will enrich the lives of local veterans and their families that may have a disability, and/or experienced homelessness or economic challenges which have made it difficult to afford quality housing.

TOTAL DEVELOPMENT COSTS

\$69.3 Million

PERMANENT SOURCES

Conventional Perm Loan.....	\$8.58 Million
CA Housing & Community Development VHHP.....	\$9.44 Million
